

## Tesla Supercharger For Your Business

### Turn Your Business Into a High-Traffic Charging Destination

EV drivers actively seek out Tesla Superchargers — and when they plug in, they stay. Installing a Tesla Supercharger at your property transforms charging into foot traffic, longer visits, and repeat customers — without the burden of managing a charging network yourself.

#### Attract More Traffic. Build Revenue That Grows.

Tesla Superchargers are built to support a growing EV market and attract drivers across brands—helping your location stay relevant, competitive, and **profitable for years**.

Add your business Logo or keep the units white labeled

### Why Businesses Choose Tesla Superchargers

#### Built-In Demand From Day One

Drivers plan trips around Superchargers. That means **instant visibility** and **consistent traffic** without spending a dollar on advertising.

#### Longer Visits = More Sales

**Average charging time is 20-40 minutes** — means more time on site for shopping, dining, and services.

#### Repeat Customers You Can Count On

EV drivers often **return weekly** or **even daily** when your site becomes part of their routine. A charging stop today becomes a loyal customer tomorrow.

#### High Utilization Without High Maintenance

You own the asset. Tesla manages the driver experience.

#### Industry-Leading Reliability

Tesla Superchargers are known for **reliable performance** — staying online, usable, and available day after day.
